B. Do the comprehension passages carefully.

1. Desert

A dry, barren and sandy region is called a desert. There is rarely any rainfall in deserts.

Not many plants and animals live there. Cactus is one of the few varieties of plants that grow in these hot areas. The stem of the cactus stores water. The leaves of the plant are like spines. They prevent water from evaporation. Burrowing animals such as kangaroo, rats, scorpions, snakes, wild rabbits, lizards, bobcats are some of the animals that live in the deserts. Most of the animals stay in their homes in the hot day. They come out of their burrows at night in search of food.
